

Everything your family made for you.

Your stories, in your own voice, kept for the people who love you.

See how it works

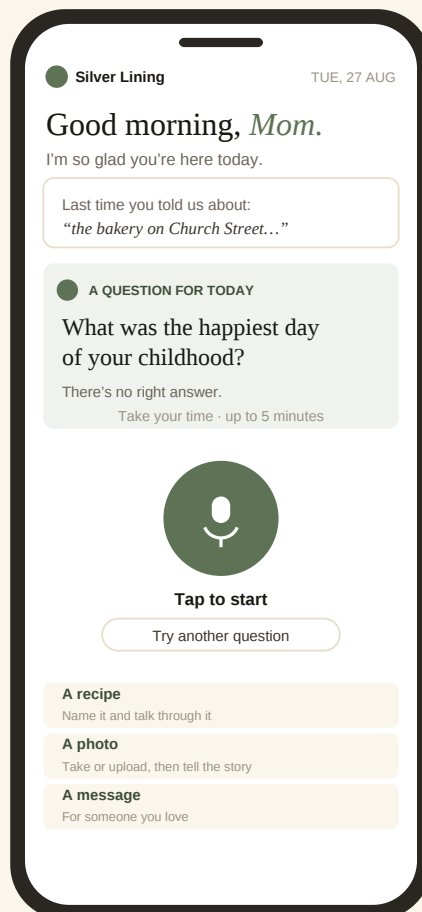

- **A question every morning**
You never have to think what to talk about, and you can swap it.

- **You only ever talk**
No typing, no computer. One button, up to five minutes.

- **They hear your actual voice**
Not a summary. The way you say things, and the way you laugh.

- **Recipes and photographs too**
Not just the daily question — anything you want to record.

- **Nothing is ever scored**
No streaks, no day you missed, nobody marking you.

- **Love and notes come back**
A heart or a message from your daughter, on this same screen.

- **You can answer them**
Type a reply straight back to whoever wrote to you.

- **They record questions for you**
You hear your granddaughter ask it in her own voice.

- **Every word written down**
Transcribed in whatever language you spoke it.

- **Family and loved ones only**
It cannot be found by searching. You can delete anything.

*Nobody else can tell these stories.
That is the whole reason it exists.*
